SUMMARY

Full-Stack Software Engineer with **5+ years** shipping production web platforms **end-to-end**, from architecture and database design through deployment and security hardening. Domain experience across legal, government, university, and on-device AI systems. **Open to full-time remote roles and select contracts.**

EXPERIENCE

Freelance Software Engineer

Independent Contractor

2023 – Present

- Designed and shipped **ATA Law Firm's case management platform** on AWS, now in daily production use by the firm: case tracking, document automation, and a secure client portal.
- Built **NEMSU Data Hub**, a multi-campus file and submissions platform serving every NEMSU campus, with resumable uploads, virus scanning, and cryptographically signed PDF documents.
- Engineered an **offline, on-device AI transcription tool** for confidential legal and medical audio, with zero cloud dependency.
- Launched **10+ community gaming sites** with player accounts, in-app economies, and independently active user bases.

Software Engineer

Province of Surigao del Sur

Jan 2021 – Dec 2023

- Built the province's **E-PDS records platform and tourism dashboard**, digitizing **500+ civil-servant files** and giving planners live visitor data.
- Delivered an internal tooling suite (GSIS deductions, BIR tax reporting, SMS notifications, an Android 201-files app) that cut routine paperwork **from hours to minutes**.
- Cut response times on high-traffic reporting views by **~60%**, profiling queries, resolving N+1 bottlenecks, and adding indexes on legacy applications.
- Introduced Git, code review, and modern deployment** to the team, cutting integration friction across government projects.
- Mentored **3 engineers** on Laravel, server environments, and release procedures.

Intern Developer

N.E. Mindanao State University

Jul – Aug 2018

- Built a **faculty-evaluation web app with Python NLP sentiment analysis**, adopted by **3,000+ students and staff**.
- Coached capstone teams through system design and stack decisions, turning academic requirements into shipping software.

SKILLS

Backend	PHP / Laravel · Spatie packages · Node.js / Express · MySQL / SQL Server · RESTful APIs · Socket.io
Frontend	Vue.js · TypeScript · Tailwind CSS · Inertia.js · HTML / CSS / JS
AI & ML	Python · CTranslate2 · Whisper · NLP · Speech-to-Text
DevOps & Security	Git / GitHub · AWS (EC2, S3, RDS) · Docker · Nginx · Cloudflare · ClamAV · PHPUnit / Pest · Linux
Go & Other	Go (tus, Bubbletea, PDF signing) · Java (Android) · C# (.NET)

SELECTED PROJECTS

ATA Law Firm case study · atafirm.ph Production case management system, case tracking, document automation, client portal on AWS. Laravel, Vue.js.	NEMSU Data Hub case study · udh.nemsu.edu.ph Multi-campus file + submissions platform, Google Drive style. Laravel + Vue + Go tus uploads + ClamAV + Google Workspace.
Offline AI Transcriber case study Local speech-to-text with real-time waveform visualization, no cloud, fully on-device. Python, CTranslate2, Whisper.	E-PDS & Tourism Dashboard case study Civil servant records platform + tourism analytics for Province of Surigao del Sur. Laravel, Vue.js, MySQL, SQL Server.
Repository Cleaner github Terminal UI for bulk-managing GitHub repos. Go, Bubbletea, Lipgloss, GitHub API.	

EDUCATION

Surigao del Sur State University

Bachelor of Science in Computer Science

2015 – 2019
