SUMMARY

Full-Stack Software Engineer with 5+ years shipping production web platforms in **Laravel, Vue.js, and AWS**, with **Go sidecars** for the long-lived and security-sensitive bits (resumable uploads, PDF signing, TUIs). Owned features end-to-end from architecture and database design through deployment, security hardening, and live release. Domain experience spans case management, civic tech, multi-campus university platforms, on-device AI tooling, and game server hardening. Open to **full-time remote roles and select contracts**.

EXPERIENCE

Freelance Software Engineer

2023 — Present

[Independent Contractor](#)

- Delivered **ATA Law Firm** case management platform (Laravel, Vue.js, AWS EC2/S3/RDS) — case tracking, document automation, and client portal in active daily production use by firm staff and clients.
- Engineered **offline AI transcription tool** (Python, CTranslate2, Whisper) — local speech-to-text with real-time waveform feedback, zero cloud dependency for confidential legal/medical audio.
- Hardened **Dragonica Spidpex** private game server under active attack — closed credential stuffing, cash-shop race conditions, stored XSS, and rolled out Argon2id + Cloudflare perimeter. Live and in daily use.
- Built **NEMSU Data Hub** — multi-campus file + submissions platform (Laravel, Vue.js, Go tus uploads, ClamAV scanning, Go PDF signer, Google Workspace integration, S3 + local FS hybrid) serving every NEMSU campus.
- Shipped **10+ community Flyff gaming sites** (Laravel, MySQL, Nginx) — player registration, item shops, and account systems each sustaining independent active user bases.

Software Engineer

Jan 2021 — Dec 2023

[Province of Surigao del Sur](#)

- Built **E-PDS civil servant records platform** and **tourism analytics dashboard** (Laravel, MySQL, Vue.js) — digitized 500+ employee 201 files and tracked provincial visitor data informing planning decisions.
- Delivered internal tooling suite — **GSIS deduction processor**, **BIR tax reporting integration**, **SMS notification service**, and **Android employee 201 mobile app** (Laravel, Java, SQL Server) — cutting routine paperwork cycles from hours to minutes across provincial offices.
- Cut response times on high-traffic reporting views by ~60% — profiling Eloquent queries, resolving N+1 bottlenecks, and adding indexes on legacy applications.
- Introduced Git/GitHub workflow and modern dev tooling** to the team standardized branching, code review, and deployment, cutting integration friction across ongoing government projects.
- Mentored 3 team members on Laravel, server environments, and live release procedures — accelerating their independent feature delivery.

Intern Developer

Jul — Aug 2018

[N.E. Mindanao State University](#)

- Built **faculty evaluation web app with Python NLP sentiment analysis** (Laravel, Python) — adopted by 3,000+ students and staff across the university.
- Coached capstone students on system design and stack decisions, turning academic requirements into shipping software.

SKILLS

Backend	PHP / Laravel · Spatie packages · Node.js / Express · MySQL / SQL Server · RESTful APIs · Socket.io
Frontend	Vue.js · TypeScript · Tailwind CSS · Inertia.js · HTML / CSS / JS
AI & ML	Python · CTranslate2 · Whisper · NLP · Speech-to-Text
DevOps & Security	Git / GitHub · AWS (EC2, S3, RDS) · Docker · Nginx · Cloudflare · ClamAV · PHPUnit / Pest · Linux
Go & Other	Go (tus, Bubbletea, PDF signing) · Java (Android) · C# (.NET)

SELECTED PROJECTS

ATA Law Firm atafirm.ph Production case management system — case tracking, document automation, client portal on AWS. Laravel, Vue.js.	NEMSU Data Hub udh.nemsu.edu.ph Multi-campus file + submissions platform — Google Drive style. Laravel + Vue + Go tus uploads + ClamAV + Google Workspace.
Dragonica Spidpex dragonicaspidpex.com Live private game server — security hardening engagement. Auth, cash shop, perimeter. Laravel, Cloudflare.	Offline AI Transcriber Local speech-to-text with real-time waveform visualization — no cloud, fully on-device. Python, CTranslate2, Whisper.
E-PDS & Tourism Dashboard Civil servant records platform + tourism analytics for Province of Surigao del Sur. Laravel, Vue.js, MySQL, SQL Server.	Repository Cleaner github Terminal UI for bulk-managing GitHub repos. Go, Bubbletea, Lipgloss, GitHub API.

EDUCATION

Surigao del Sur State University

2015 — 2019

Bachelor of Science in Computer Science
